Irresistible

A PLEASURE FOR ALL SENSES

THE SIGHT

The first step is watching the coffee, appreciate its texture, the nuances of its cream's color, its consistency, its soft and velvety appearance.

THE SMELL

The second step is to approach the coffee as to prize its smell, its fragrance, its heady roasted notes and the most delicate suggestions of flowers, fruits and chocolate. Only the best coffee varieties allow to appreciate the aromas and the charm of their origins.

THE TASTE

At this point, we are ready to taste, to slowly enjoy all the different characteristics of Mokador blends. If tasted without sugar, it is possible to fully appreciate the flavors, the softness and the sparkling note of the Arabica.

THE AFTERTASTE

The coffee has gone but its effect is not concluded yet. The aromas and flavors remain for a long time, leaving the pleasant memory of a deep and intense sensation.

Tata Plus.

Mokador presents Tata Plus, the new coffee machine with an elegant and essential design, perfect everywhere and always ready to serve the best espresso of the day.
